GRILLO

Füttern verboten
ORMESA

GRILLO

One single gait trainer, endless opportunities.

Grillo is a gait trainer designed to facilitate the autonomous movement of children and adults.

Grillo's original design and **patented height adjustment system** makes it **stylish and safe to use.**

Available in the **front and rear drive models**, it is extremely customizable, **easy to use and versatile**, due to its various adjustments and wide range of available supports.

Dynamic frame

Gait trainer with an optimal centre of gravity

Grillo grows with you

With its extremely light aluminium folding frame, **Grillo is easy to push and manoeuvre** for those with reduced voluntary motor skills and balance, and folds up for compact storage and ease of transport.

It has a gas-spring system that allows for safe and easy frame adjustment, **even in use**, whether stationary or in movement.

The optimal centre of gravity height adjustment system allows a Grillo of just one size to adapt to the growth of a child over a long period of time.

ORMEJA
MADE IN ITALY

Configurable to adapt to any need

Front Drive

P Configuration

with pelvic support and handlebar.

For users with moderate trunk control needing some pelvis support.

PT Configuration

with pelvic and thoracic supports and handlebar.

For users needing both pelvis and trunk support. The two independent supports allow forward flexing of the trunk to facilitate the gait cycle.

PA Configuration

with pelvic and arm supports.

For users with partial trunk control needing some pelvis support. The upper limb support facilitates trunk control.

PTM Configuration

with pelvic support, table and handlebar.

For users needing both frontal pelvic and trunk support. The upper limb support facilitates trunk control.

Rear Drive

P Configuration

with pelvic support and handles.

Model offering pelvic support all the way round. Suitable for users with moderate trunk control.

PT Configuration

with pelvic support, thoracic support and handles.

For users needing both rear pelvic and trunk support. The two independent supports allow forward flexing of the trunk to facilitate the gait cycle.

PA Configuration

with pelvic and arm supports.

Model offering pelvic support all the way round, as well as upper limb support. Suitable for users with moderate trunk control. The upper limb support facilitates trunk control.

Independent anatomical

supports for trunk and pelvis

Their versatility, adaptability and ergonomics ensure safety, stability and all the way round support for the user while both standing and walking.

They support the user's trunk without forcing its positioning or movement.

Designed and built to give the same **feeling of safety and support** as a parenting supporting their child.

The anatomical supports are available in 4 sizes, just like the frames. However, in order to meet the specific needs of a user, such as very tall and thin person, it is sometimes **better to use the supports of a smaller size than the frame.**

Supports size S, frame size M

Precise, continuous adjustments

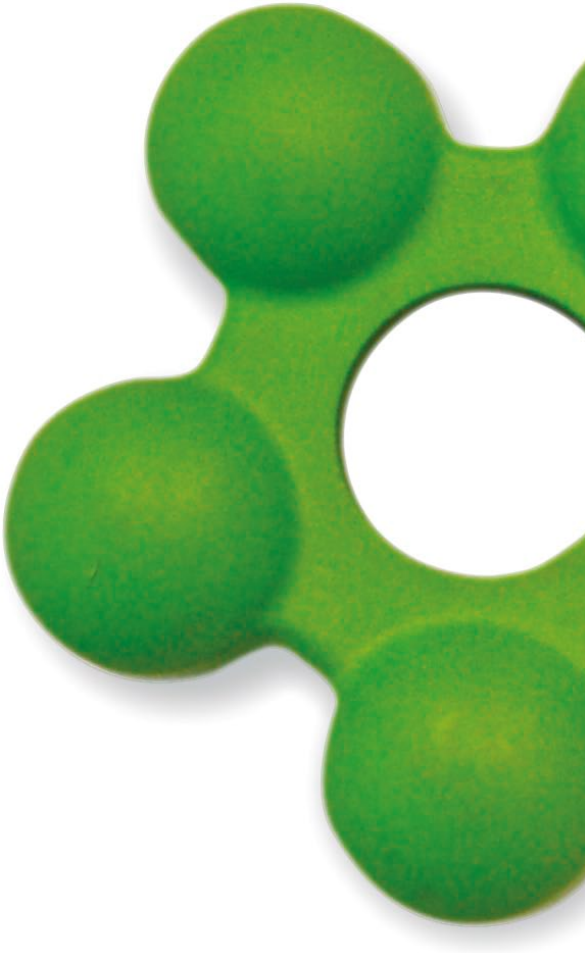

All adjustments are made using levers or adjustable safety handles, without needing any tools. This allows safe and easy adjustments and modifications, **even while in use**. It also allows for easy addition and removal of interchangeable supports.

Inclination adjustment.

Circumference and width adjustment.

Height adjustment (upper pelvis size L is adjustable only with the frame).

Forward-backward adjustment.

Graduated bars

Present on all adjustable supports, these **allow a certain posture to be set or restored by the doctor or therapist** after closing the frame or use by another user, thus avoiding the risk of adjusting the aid in an inappropriate way.

Ergonomic harness

With an abductive effect, it **supports the user in case of need, when needed acts as weigh bearing relief on lower limbs without generating any genital or inguinal pressure.** Made to ensure maximum comfort and safety, it is removable, machine washable and easy to adjust.

Quick and easy folding

The Grillo can be folded in one movement, for compact storage and ease of transport. **The frame folds in on itself without the need to remove any support.**

Ormesa designed wheels
suited to any surface

Rear wheels with:
> Anti-rollback system: that prevents backwards movement. Suited to users without good head or trunk control using the device for the first time.
> Adjustable braking: to reduce gait speed. 5 adjustment positions.
> Compatible with manual braking.
> Parking brake: it is easily operated by the red pedal. Useful for positioning the user and for transport.

Front swivel wheels with:
> Steerable wheels: that prevent the front wheels from turning, guaranteeing linear stability and allowing the user to focus exclusively on propulsion and not on steering control.
>By reversing the wheels, it is possible to transform the front configuration into a rear one, and vice versa.

Wheel dimensions:	SIZE mini	SIZE S	SIZE M	SIZE L
front	15 cm	15 cm	17,5 cm	17,5 cm
rear	20 cm	20 cm	25 cm	25 cm

Postural supports and inte

865 Multiadjustable headrest
With height, inclination and forward-backward adjustment.

925 Thoracic support
Configurable, by replacing the tubes, as follows:
> Upper thoracic, size mini on Grillo S.
> Upper thoracic, size S on Grillo M.
> Upper thoracic, size M on Grillo L.

924 Pelvic support
Configurable as follows:
> Upper pelvis, size mini on Grillo S.
> Upper pelvis, size S on Grillo M.
> Upper pelvis, size M on Grillo L.

930 Ergonomic harness
Further adjustable for sizes M and L.
Configurations:
> Harness size S on Grillo M.
> Harness size M on Grillo L.

894 Rear table belt for Grillo PTM
With circumference adjustment, for size mini.

926 Adjustable handlebar
With depth, height and inclination adjustment.

erchangable components

809 Arm supports
With depth, inclination, rotation, height and pronosupination adjustment. Also positionable outside the handle.

943 Arm straps
With circumference adjustment.

809 Arm supports for size mini
With height, depth and rotation adjustment.

943 Arm straps for size mini
With circumference adjustment.

937 Ergonomic handles for Grillo mini PTM
With height, inclination, forward-backward, rotation and width adjustment.

939 Ergonomic handles
With height, inclination, forward-backward, rotation and width adjustment.

Postural supports and inte

927 Removable knobs
Independent width adjustable.

919 Lumbar thrust support
With height adjustment. For size S and M.

918 Folding seat
With height adjustment and foldable. For size S and M.

815 Proximal abductor
With height adjustment. Provides support in case of need, and can be closed while walking.

NEW

946 Ergonomic saddle
With strap adjustment.

923 Additional assistant push handle
With height adjustment.

erchangable components

890-C Leg divider with thigh loops

To prevent lower limb adduction. **Guides the gait cycle**, facilitating the correct sequence of movements. Height, circumference and stride width adjustable. **Innovative design** ergonomic leg loops offer three degrees of freedom: longitudinal, vertical and rotative, allowing for natural physiological walking movements.

890-SC Distal abductor

With height adjustment.

810 Weighting bars

Grillo Small + 2,6 kg. x 2.
Grillo Medium and Large + 3,4 kg. x 2.

928 Rear narrow base wheels with parking brake pedals

Pair of Ø200 fixed wheels and forks with parking brake pedals.
Frame width reduction:
size M from 76 to 68.5 cm
size L from 80 to 72.5 cm.

NEW

Rear Wheels with:

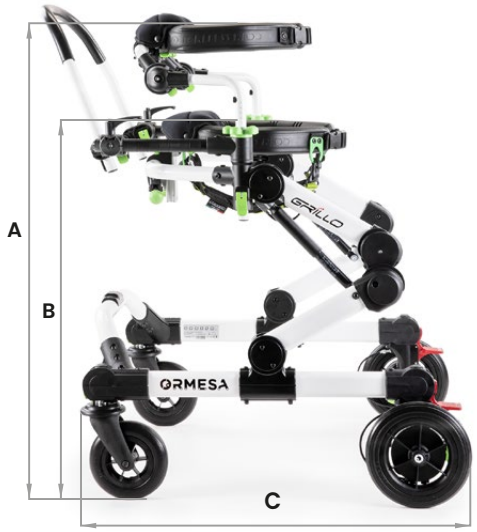

> Anti-rollback system.
> Adjustable braking.
> Parking brake.
